PROFESSIONAL SUMMARY

Final-year CSE (Data Science) student building production-style systems in Python, SQL, and the MERN stack. Delivered an enterprise NER/PII platform, semantic duplicate-document detection, and data-cleaning pipelines. Seeking a software or data engineering role with clean code, structured delivery, and measurable impact.

TECHNICAL SKILLS

Languages: Python, C, C++, SQL, JavaScript, HTML, CSS, R

Frameworks: FastAPI, Django, Flask, React.js, Node.js, Express.js

Data & NLP: Pandas, NumPy, GLiNER, Transformers, Sentence-Transformers, scikit-learn, Regex

Databases: PostgreSQL, MySQL, MongoDB, SQLAlchemy

Analytics: Power BI, Tableau, Excel, Alteryx Designer, DBeaver, Matplotlib, Seaborn

Tools: Git, REST APIs, JWT Auth, Vite, Jupyter, PyCharm

EDUCATION

Medicaps University, Indore

2022 – 2026

B.Tech. Computer Science & Engineering — Data Science

CGPA: 6.86 / 10

Aklank Public School, Kota | Class XII, CBSE | 77%

2022

Bansal Public School, Kota | Class X, CBSE | 62.10%

2020

INTERNSHIPS

Data Analyst Intern — VGT Kota

Jul 2025 – Aug 2025

- Cleaned and analysed datasets with Python (Pandas, NumPy), Excel, and MySQL; summarised results in R.
- Built Power BI and Tableau dashboards for business reporting and visual decision support.

Alteryx Designer Intern — Academic / Research

Jun 2025 – Jul 2025

- Built Alteryx Designer workflows for data preparation, blending, and repeatable analytics automation.

PROJECTS

Enterprise GLiNER NER Platform

FastAPI, React, GLiNER, SQLAlchemy, OpenAI

- Role-based NER product with batch file/folder/archive upload, scan progress, history, and admin/user access.
- Hybrid detection: contextual GLiNER plus deterministic PII extractors (Aadhaar, PAN, GST, cards, email, phone).
- Fine-tuned GLiNER on an enterprise dataset and compared results against OpenAI NER.

Duplicate Document Finder

Python, Sentence-Transformers, scikit-learn, Pandas

- Detected exact and near-duplicate documents with sentence embeddings and similarity ranking.
- Produced clustered duplicate reports so reviewers can inspect matching document pairs quickly.

PII Scanner

Python, Regex, pypdf, python-docx

- Scanned TXT, PDF, and DOCX files for emails, phones, and sensitive keywords; exported count-based reports.

Mini File Search & Sensitive Data Detection

Python, OS, Regex

- Indexed folders of text files and returned keyword hits with file name and line number.
- Flagged sensitive content during search so reviewers can locate PII-like terms quickly.

Keyword Detection System

Python, Regex, PyPDF2, python-docx

- Read TXT, PDF, and DOCX files and detected emails, phone numbers, and predefined sensitive keywords.
- Generated a count-based report summarising matches by file and keyword type.

Additional practice: PostgreSQL schema + analytical SQL in DBeaver (top users, duplicates, summaries); Pandas log analyser (ERROR/WARNING/INFO); CSV cleaning pipeline with quality report.

CERTIFICATIONS

Python (85) · C++ (85) · MERN Stack (85) · Web Development (85) · DSA (85) · Alteryx Community (90)

LEADERSHIP

- Organised and mentored campus teams; represented the institute in inter-university competitive events.
- Winner — Medicaps University Valorant Tournament (2023); Winner — Jio Games Campus Cup (2025); 2nd — GodLike Esports (2023).
